

SPIRALLY WOUND DUCTS

 SPIROVENT

 VENTS

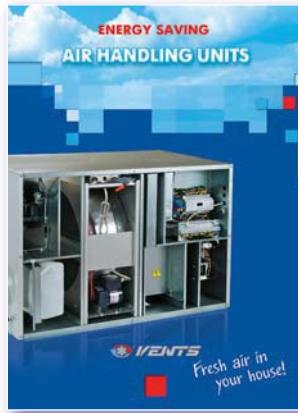

2014

Fresh air in
your house!

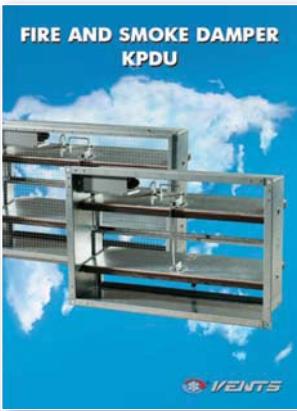

Industrial and commercial ventilation (Catalogue no. 1)

Industrial and commercial ventilation components - fans for round and rectangular ducts, sound-insulated, axial and roof fans, air handling units with heat recovery, air heating units, accessories.

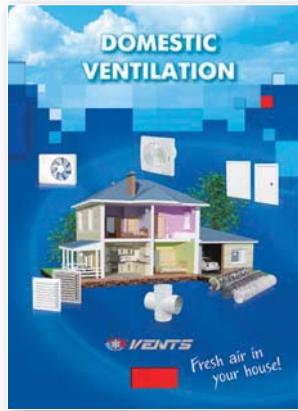

Energy saving ventilation Air handling units (Catalogue no. 2)

Energy saving supply and exhaust units and air handling units with heat recovery with air capacity up to 6500 m³/h.

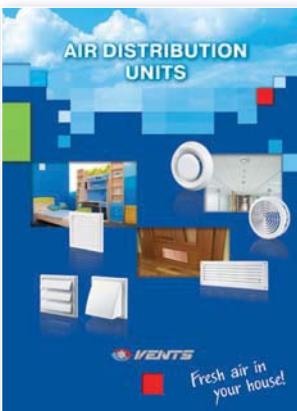

Fire and smoke damper KPDU (Catalogue no. 5)

Fire dampers KPDU for smoke protection systems of buildings and premises.

Domestic ventilation (Catalogue no. 6)

Domestic ventilation: fans, mono-pipe exhaust kitchen and bathroom fans, air distribution units, air ducts and fittings, access doors, ventilation kits.

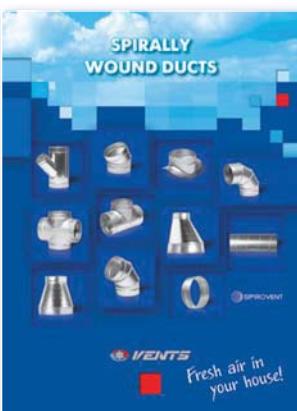

Air distribution units (Catalogue no. 9)

Plastic and metal air distribution products (grilles, disk valves, diffusers, etc.) for ventilation, air conditioning and heating.

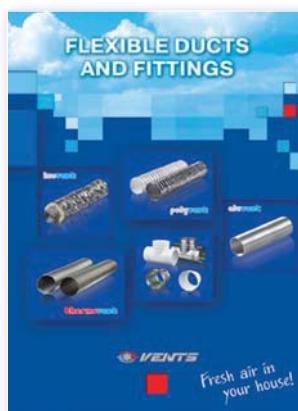

Access doors (Catalogue no. 10)

Plastic and metal access doors for accessing concealed equipment and utility lines. Special offers for ceramic tiles.

Spiral seam air ducts (Catalogue no. 13)

SPIROVENT spiral seam vent ducts and fittings of 100 to 1600 mm diameter.

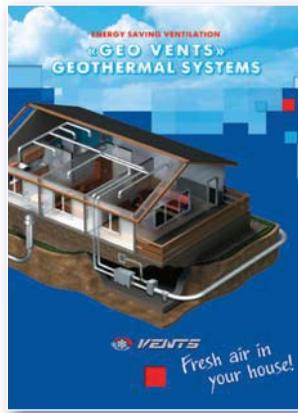

Flexible ducts and fittings for ventilation, air conditioning and heating (Catalogue no. 14)

Flexible and semi-flexible air ducts made of polymeric materials, aluminium, galvanized or stainless steel, metal fittings for ventilation, air conditioning, heating, gas handling and abrasive particles aspiration.

Air handling units AIRVENTS (Catalogue no. 3)

Energy saving air handling units with air capacity up to 40 000 m³/h, for use in large residential, industrial and commercial objects.

Energy saving ventilation Geothermal systems GEO VENTS (Catalogue no. 4)

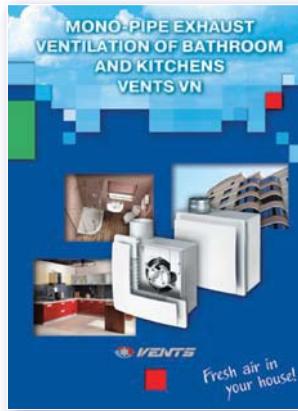

Energy saving system GEO VENTS with use of the earth's surface layers heat. High ventilation system energy efficiency and low operating costs.

Domestic fans (Catalogue no. 7)

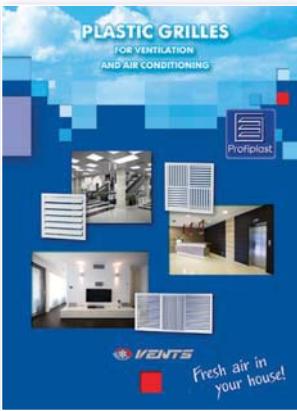

Domestic fans with air capacity up to 365 m³/h with extra functions: timer, humidity sensor, motion sensor, etc.

Applied for premises up to 30 m².

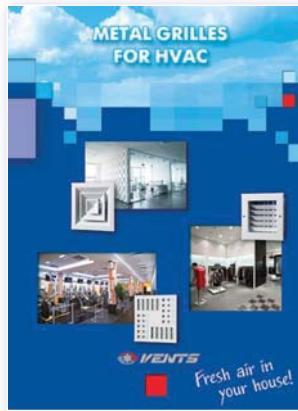

VENTS VN Mono-pipe exhaust ventilation (Catalogue no. 8)

Exhaust ventilation in houses with mono-pipe ventilation system based on VENTS VN fans.

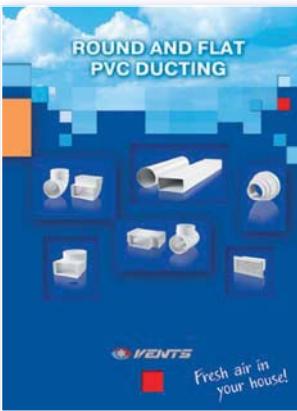

Plastic grilles for ventilation and air conditioning (Catalogue no. 11)

PROFIPLAST extruded plastic grilles for ventilation and air conditioning.

Metal grilles for ventilation, air conditioning and heating (Catalogue no. 12)

Metal grilles made of extruded metal profile for ventilation and air conditioning.

Flat and round PVC air ducts (Catalogue no. 15)

Flat and round PVC ducts PLASTIVENT for ventilation of residential, office and commercial premises and connection of exhaust ventilation equipment (kitchen extractors, hoods, exhaust boxes, etc). Wide product range of fittings.

Energy saving ventilation. Single room energy recovery ventilators. (Catalogue no. 16)

Single room reverse ventilators with energy regeneration for efficient ventilation and lowest investments in ready-built and brand new premises.

WELCOME TO THE VENTS WORLD!

VENTS company was founded in the nineties of the XXth century.

Dynamic development of the enterprise and ongoing study of the consumer demand enabled rapid international leadership of the company in the ventilation industry.

VENTS is a powerful research and development enterprise with 2500 professionals working as a single team to ensure a full production cycle from idea to end product. The production base of the company is located at more than 60 000 m² area. It includes 16 workshops equipped under the latest international standards and each of them is comparable to a separate plant.

Modern equipment, active implementation of advanced technologies and highly automated production are the characteristic features of VENTS company.

The company undergoes rapid dynamic development; fundamental researches and effective designs in climatic equipment industry are in the focus of the company's business strategy.

The joint cooperation of the corporate design department, test laboratories and production workshops let us introduce high quality products to the market.

Special attention is paid to the manufacturing of the goods during all manufacturing stages including monitoring of the technological conditions. Technical characteristics of supplied raw materials are thoroughly checked. Quality control system which meets international standard requirements ISO 9001:2000 was implemented at the enterprise.

Environmental protection is one of the basic components of the corporate development. The technological process at the enterprise is arranged in such a way as to exclude any negative impact to the environment. To solve the global energy saving problem we develop a special climatic equipment that provides comfortable conditions for people and reduces the energy demand significantly.

Perfect quality, competitive prices, high production potential, technical capabilities and the wide product range stimulate long-term partnership and product promotion all over the world.

The VENTS ventilation products are exported to more than 90 countries and are sold through the distribution network of 120 companies worldwide. Share of the VENTS products globally is above 10%.

VENTS is a member of high-rank international organizations, the leading HVAC experts.

Since 2008 VENTS has been a fully-featured member of HARDI Association (Heating, Air-conditioning and Refrigeration Distributors International, USA).

Since 2010 VENTS has been a participant of AMCA Association (the Air Movement and Control Association (AMCA) International, Inc.). In 2011 VENTS successfully passed tests for compliance with AMCA standards and the VENTS products were certified for the USA market.

In 2011 VENTS joined HVI (Home Ventilation Institute, USA) Association.

Metal processing workshop

Spiral air ducts workshop

Flexible air ducts workshop

Aluminium grilles and diffusers workshop

Powder coating workshop

Wet coating workshop

Extrusion workshop

Injection moulding workshop

Residential fans workshop

Ventilation grilles workshop

Electric motors workshop

Industrial fans workshop

Air handling units workshop

AirVents air handling unit workshop

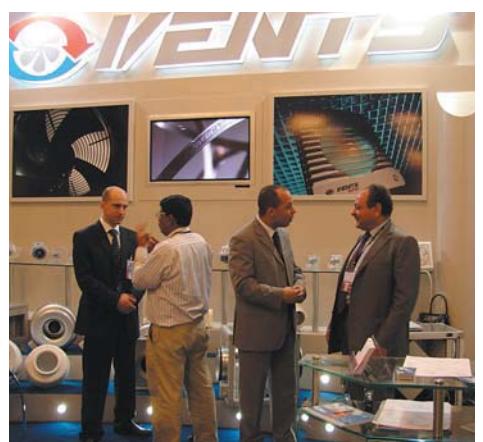

Electrical accessories workshop

Extruded grilles workshop

Powerful production facilities, high automation level, active implementation of innovative technologies in the production process made VENTS a worldwide ventilation leader.

We manufacture our products with respect to unique geographical, climatic, technical features of each country and do our best to fulfill the client's wishes anywhere anytime.

Get benefit from cooperation with VENTSTM and enjoy the maximum range of products of the top quality from one manufacturer.

Spirally wound air ducts are the best technical solution for ventilation systems' mounting

Efficiency of spirally wound ducts' use is conditioned by several factors: first of all high level of aerodynamic characteristics of spirally wound air ducts; secondly – advantage of mounting: mounting of spirally wound air ducts is carried out easily and quickly with straight segments and sections of fittings. Due to the high quality of fittings, construction of the fittings and hermiticity, the decrease of air leak, waste of pressure and noise level is observed.

The modern automated line of high-precision machines «Spiro International Group» (Switzerland) with computer process control ensures the full cycle of production of air ducts and fittings of circular section (\varnothing 100-1600 mm).

All the products made from galvanized steel in conformity with requirements of state standard specification 24751-81 and construction regulations 2.04.05-91 without the breach of zinc covering on rabbeting connection. The product range of air ducts and fittings complies with European standards for air ducts.

Hermiticity of all products corresponds to class "D" (dense). The duct system stands constant air flow pressure up to 3000 Pa and by simultaneous pressure difference - up to 5000 Pa.

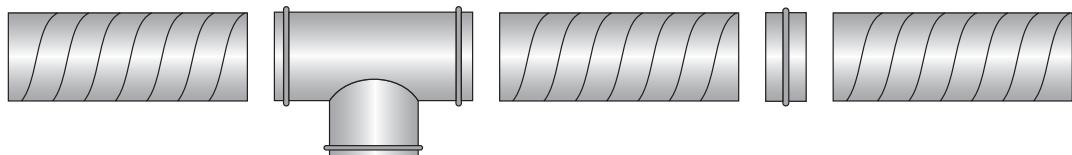

Connection of air ducts – coupling with use of sealant (silicone), which is fixed with the screw or clincher. Coupling is used for connection of straight segments. The fittings are connected with female coupling.

Air ducts and fittings are made from galvanized steel, thickness: $p=0,55$ (\varnothing - 100-355 mm); $p=0,7$ (\varnothing - 400-800 mm); $p=1,0$ (\varnothing - 900-1600 mm). To provide the hardness of air ducts with diameter of more than 315 mm the additional reinforcing ribs (intermediate ridge) are used.

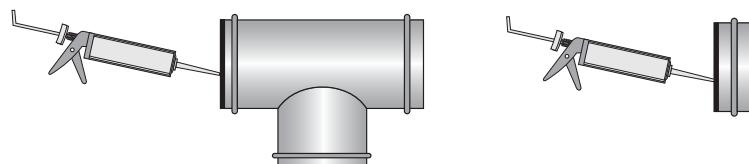

Any fitting or network equipment (silencers, throttles etc.) is a coupling element. Coupling is used only for straight segments' joining. The fittings are connected with a female coupling.

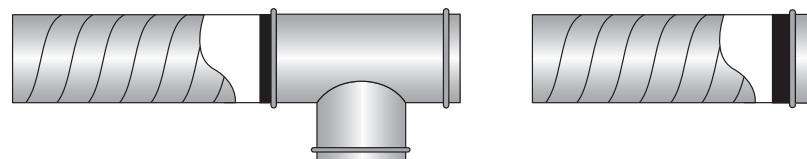

1. Accomplish calculations of the chosen ventilation system and choose the necessary components;

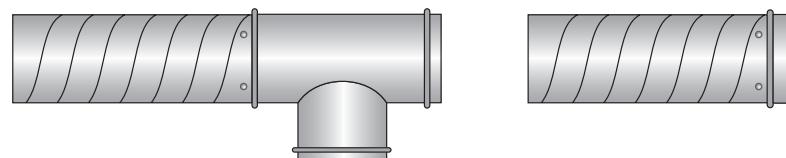

2. Apply a thin (2-3 mm) stripe of sealant (silicone) on the edge of the fitting*;

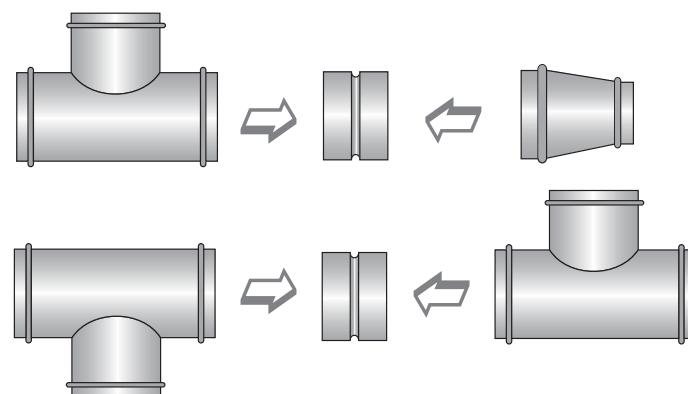

3. Mount the fitting into the straight duct segment;

4. Fix the connection;

5. Female coupling is used for two fittings' connection.

* product with a sealing ring does not require the application of sealant
